

SupBoard

last edit on 2017-11-27

description

SupBoard is a tool developped and maintained by Guillaume Sivade for the SUPINFO Nice campus.

installation

- install python3 and pip3
- go to the root app folder
- `pip3 install -r requirements.txt`
- `python3 manage.py migrate`
- `python3 manage.py createsuperuser` *this will be the app admin*
- `python3 manage.py runserver 0.0.0.0:{port} --insecure` *port is optional, insecure is to get files statically, this mode is not recommended, read [the official documentation before](#)*
- go to `ip:{port}`
